CT5558 Features & Benefits

[Expand all](#) ▾

Performance 10

Independent PTO

Independent power take-off (PTO) allows you to simply flip a switch to engage or disengage the PTO without stopping the tractor or using the clutch. This comes in handy for tasks that require frequent stopping and restarting of your implement, including moving from one hole to the next as you use the auger.

Power Take-Off (PTO) ▲

Till your garden and plant a spring food plot. Clear weeds from the ditches and pastures. Dig holes for fence posts or trees in all types of soil conditions. Mow your acreage in an afternoon. You can do it all with power take-off (PTO). Rear PTO is standard on all Bobcat compact tractors, and mid PTO is standard on select models and optional on all other models except 4000 Platform models with a manual transmission. PTO coupled with the three-point hitch allows you to operate numerous implements with ease.
